

Providing Much-needed **CLARITY** for Clinical Trial Transparency

The CLARITY Model is at the heart of this approach, a seven-step blueprint for building a robust yet agile clinical trial disclosure function.

Central governance & SOPs
Establish a global disclosure governance framework

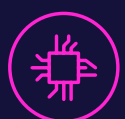

Local empowerment
Implement a “hub-and-spoke” operating model

Accountability
Define a clear RACI (responsible, accountable, consulted, informed) matrix

Roadmap for improvement
Use a step-by-step approach for best results

Integrated technology
Leverage an integrated technology platform

Training & culture
Standardize training & continuous engagement

Year-round oversight
Conduct periodic audits & quality checks

Read the full article on this flexible but structured [CLARITY model](#) and how it provides a framework for harmonizing processes, ensuring compliance, and optimizing resource use.
