

The Smarter Way to Forecast Pharma Markets

Empower your team with intuitive, best-practice forecasting tools designed for pharmaceutical success.

Maximize Your Epidemiology Forecasting With Epi+

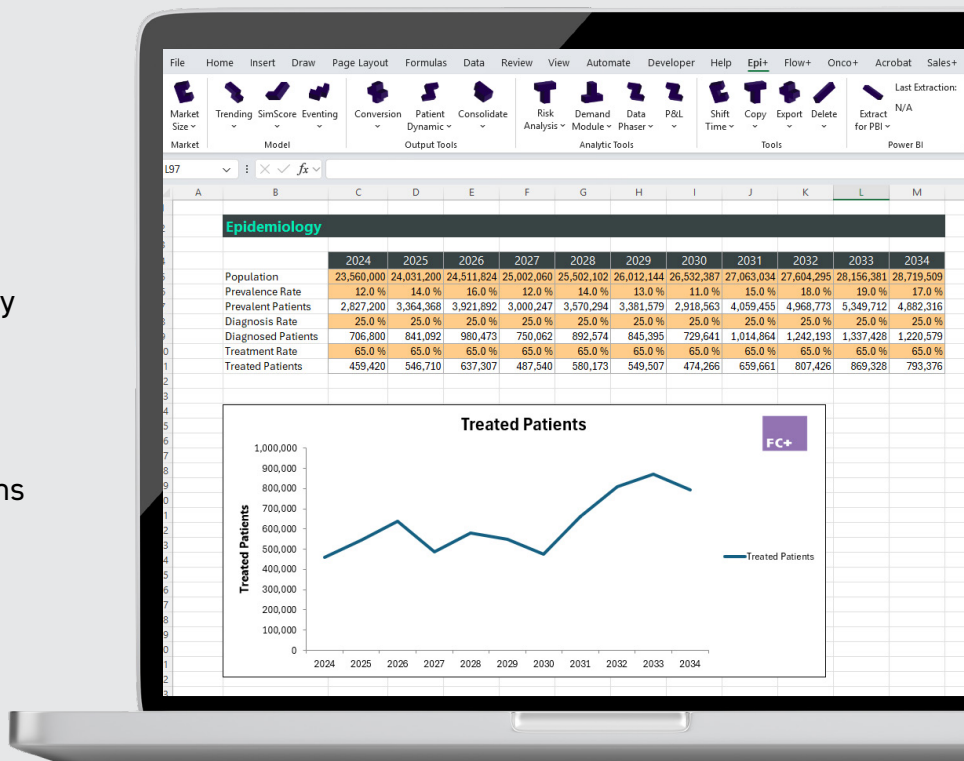

Advanced forecasting software that redefines industry standards.

Generate more accurate and actionable insights for any market, disease area, or product. Part of the FC+ suite of Excel add-ins, Epi+ has been specifically created for pharmaceutical epidemiology and patient-based cross-sectional modelling. It combines best-practice methodology with intuitive design to build unlimited transparent, robust models quickly.

CREATE AND POPULATE
FORECASTING MODELS ANYTIME,
ANYWHERE – EFFICIENTLY AND
COST-EFFECTIVELY.

Why Choose Epi+

- ▶ Create multiple forecasts efficiently
- ▶ Size your market and patient subsegments clearly and easily
- ▶ Forecast acute or chronic conditions with ease
- ▶ Flexibility to convert as many products as required
- ▶ Training and support included
- ▶ Easy to use for all teams
